Science Case in the Design Study Document

B.S. Sathyaprakash

CARDIFF UNIVERSITY
PRIFYSGOL CAERDYDD

Design Study Document

Design Study Document

- Consists of 6 chapters

Design Study Document

- Consists of 6 chapters
  - Introduction and summary (5-10 pages)

Design Study Document

- Consists of 6 chapters
  - Introduction and summary (5-10 pages)
  - Science Case and Data Analysis (100 pages)

Design Study Document

- Consists of 6 chapters
  - Introduction and summary (5-10 pages)
  - Science Case and Data Analysis (100 pages)
  - Optics (100 pages)

Design Study Document

- Consists of 6 chapters
  - Introduction and summary (5-10 pages)
  - Science Case and Data Analysis (100 pages)
  - Optics (100 pages)
  - Thermal Noise and Suspensions (100 pages)

Design Study Document

- Consists of 6 chapters
  - Introduction and summary (5-10 pages)
  - Science Case and Data Analysis (100 pages)
  - Optics (100 pages)
  - Thermal Noise and Suspensions (100 pages)
  - Site and Infrastructure (100 pages)

Design Study Document

- Consists of 6 chapters
  - Introduction and summary (5-10 pages)
  - Science Case and Data Analysis (100 pages)
  - Optics (100 pages)
  - Thermal Noise and Suspensions (100 pages)
  - Site and Infrastructure (100 pages)
  - Overall Budget and Timeline (5-10 pages)

DSD - Who is it for?

DSD - Who is it for?

- The design study document will be different in many ways from the vision document

DSD - Who is it for?

- The design study document will be different in many ways from the vision document
  - Vision Document was essentially an internal document for our own use

DSD - Who is it for?

- The design study document will be different in many ways from the vision document
  - Vision Document was essentially an internal document for our own use
  - Design study document is addressed to a wide audience: funding agencies, international collaborators, future researchers, postgraduate students and for us as a reference point when we begin the next phase of the study

DSD - Who is it for?

- The design study document will be different in many ways from the vision document
  - Vision Document was essentially an internal document for our own use
  - Design study document is addressed to a wide audience: funding agencies, international collaborators, future researchers, postgraduate students and for us as a reference point when we begin the next phase of the study
- We need to thoroughly revise parts of the current text to make it appeal to this wide audience

DSD - Who is it for?

- The design study document will be different in many ways from the vision document
  - Vision Document was essentially an internal document for our own use
  - Design study document is addressed to a wide audience: funding agencies, international collaborators, future researchers, postgraduate students and for us as a reference point when we begin the next phase of the study
- We need to thoroughly revise parts of the current text to make it appeal to this wide audience
- We will use a number of different tools (see next page) to achieve this goal

Structure of the Document

Structure of the Document

- Smooth flowing text without too many mathematical equations

Structure of the Document

- Smooth flowing text without too many mathematical equations
- Heavy use of boxes, graphs, tables, images, illustrations

Structure of the Document

- Smooth flowing text without too many mathematical equations
- Heavy use of boxes, graphs, tables, images, illustrations
  - This is where your help is needed

Structure of the Document

- Smooth flowing text without too many mathematical equations
- Heavy use of boxes, graphs, tables, images, illustrations
  - This is where your help is needed
- Three different types of boxes will be used to include mathematical description, provide additional information and highlight important results obtained during the study

Structure of the Document

- Smooth flowing text without too many mathematical equations
- Heavy use of boxes, graphs, tables, images, illustrations
  - This is where your help is needed
- Three different types of boxes will be used to include mathematical description, provide additional information and highlight important results obtained during the study
- Use of 3 different "nomenclatures": acronyms, glossary and list of symbols

Who is involved in writing and timescale?

Who is involved in writing and timescale?

- Michele Punturo and Harald Lueck have established the Transversal Writing Team (TWT)

Who is involved in writing and timescale?

- Michele Punturo and Harald Lueck have established the Transversal Writing Team (TWT)
- From WG4 TWT members are

Who is involved in writing and timescale?

- Michele Punturo and Harald Lueck have established the Transversal Writing Team (TWT)
- From WG4 TWT members are
  - Sofiane Aoudia, Thomas Dent, Tania Regimbau, B.S. Sathyaprakash, Chris Van Den Broeck

Who is involved in writing and timescale?

- Michele Punturo and Harald Lueck have established the Transversal Writing Team (TWT)
- From WG4 TWT members are
  - Sofiane Aoudia, Thomas Dent, Tania Regimbau, B.S. Sathyaprakash, Chris Van Den Broeck
- It is the primary responsibility of TWT to deliver the document

Who is involved in writing and timescale?

- Michele Punturo and Harald Lueck have established the Transversal Writing Team (TWT)
- From WG4 TWT members are
  - Sofiane Aoudia, Thomas Dent, Tania Regimbau, B.S. Sathyaprakash, Chris Van Den Broeck
- It is the primary responsibility of TWT to deliver the document
- Timescale: Delivery to EC officials: 20 May in Pisa

Who is involved in writing and timescale?

- Michele Punturo and Harald Lueck have established the Transversal Writing Team (TWT)
- From WG4 TWT members are
  - Sofiane Aoudia, Thomas Dent, Tania Regimbau, B.S. Sathyaprakash, Chris Van Den Broeck
- It is the primary responsibility of TWT to deliver the document
- Timescale: Delivery to EC officials: 20 May in Pisa
  - First completed draft: 30 April

Who is involved in writing and timescale?

- Michele Punturo and Harald Lueck have established the Transversal Writing Team (TWT)
- From WG4 TWT members are
  - Sofiane Aoudia, Thomas Dent, Tania Regimbau, B.S. Sathyaprakash, Chris Van Den Broeck
- It is the primary responsibility of TWT to deliver the document
- Timescale: Delivery to EC officials: 20 May in Pisa
  - First completed draft: 30 April
  - Proof reading and minor corrections: 1-14 May

  - First completed draft: 30 April
  - Proof reading and minor corrections: 1-14 May
  - Printing 15-19 May

How can you help?

How can you help?

- Provide good quality figures, diagrams, images, illustrations (deadline 15 April)

How can you help?

- Provide good quality figures, diagrams, images, illustrations (deadline 15 April)
- Come up with ideas for boxes and, if necessary, help in writing them

How can you help?

- Provide good quality figures, diagrams, images, illustrations (deadline 15 April)
- Come up with ideas for boxes and, if necessary, help in writing them
- Sign-up to be a reader of the science case(15 April-30 April)

How can you help?

- Provide good quality figures, diagrams, images, illustrations (deadline 15 April)
- Come up with ideas for boxes and, if necessary, help in writing them
- Sign-up to be a reader of the science case(15 April-30 April)
- Help with finalizing (30 April-14 May)

How can you help?

- Provide good quality figures, diagrams, images, illustrations (deadline 15 April)
- Come up with ideas for boxes and, if necessary, help in writing them
- Sign-up to be a reader of the science case(15 April-30 April)
- Help with finalizing (30 April-14 May)
- What do you get in return?

How can you help?

- Provide good quality figures, diagrams, images, illustrations (deadline 15 April)
- Come up with ideas for boxes and, if necessary, help in writing them
- Sign-up to be a reader of the science case(15 April-30 April)
- Help with finalizing (30 April-14 May)
- What do you get in return?
  - Hopefully a billion dollar detector in 15 years time!

How can you help?

- Provide good quality figures, diagrams, images, illustrations (deadline 15 April)
